Alock W

Polycarbonate seal with transparent capsule and coloured anchor. The anchor is pre-assembled with a standard 16cm length 0.81mm stainless steel wire. Other lengths of 25, 30, 39, 50, 79cm are available. The anchor is semi inserted into the capsule to protect against tampering of the locking pins before closure (fake sealing). The numbers are laser printed on both the tab and the anchor. The laser printing of a bar coded seal is on a white background on capsule with matching number on the anchor. Personalisation can be laser marked on capsule.

Laser Printed matching numbers on both tab and anchor

Alock W SLM #028SLM16ST2PC

Laser printed bar code on white background of tab and matching number on anchor

Alock W CB #028B12816ST2PC

Alock seals can also be supplied without pre-assembled wire

Alock seals mat of 5
