

# Elckette 1N, 2N, 3N

These pull-up seals are individually identifiable by a random high relief letters and numbers code that is moulded on the tag at time of manufacture. This process avoids the possibility of alterations, or forged copies. The Elckette 3N has a tear-off tab to facilitate removal. The overall lengths are 14cm, and 21cm, with operational lengths of 8cm and 15cm. Personalisation is available for quantities over 10,000.

Elckette 1N and 2N  
Alphanumeric code on tab  
moulded in high relief
